

Case Study

Pulp and Paper Mills, Northwest, U.S.A.

No matter **what** the
“**Case**” may be...

We **provide** the
missing **piece**!

Problem

A pulp and paper mill in the Northwest, USA, manufactures high-end paper products for the print industry. Due to odors caused by sludge piles in their landfill, the townspeople began to complain. The mill manager reported trying various products and being successful with none of them.

Solution

After receiving a testimonial from another pulp and paper mill that uses HLS Ecolo AirSolution, the mill called up and requested an emergency shipment couriered to them. The next day, HLS Ecolo air freighted a pump system and a quantity of AirSolution. The system and the AirSolution began doing its work immediately. Local Aldermen, upon visiting the site, gave their unanimous approval to the HLS Ecolo installation. Townspeople are no longer complaining. Another satisfied customer!

Results

- Odor elimination.
- Public complaints subsided.
