

Because the
only things
your residents
want to smell
are the roses

How to take tenant complaints about bad smells off your to-do list **Forever.**

Imagine if you never had to worry about odour management again – and you had the best odour control technology available for just a few dollars a day?

You get all that – and more – with Ecolo Odour Control Systems, the #1 odour management company in the GTA with a 30-year track record and thousands of installations in condos and apartments. Better still, your first three months are free. But don't wait as this is a limited time offer.

Three free months of the best odour control system in the GTA

The timing could not be better because new waste diversion programs, such as Organics/Green Bin collections, are raising the need for effective odour control.

It's quick and easy to get started because our Free Assessment only takes 15 minutes and it can be done with either yourself or your superintendent present. You will also appreciate that our Free Assessment will identify not only existing sources of odour, but also potential future issues in a variety of areas, including these common odour sources:

Garbage room & chute
Organics room
Main entrances/foyers
Restrooms

Recycling room
Fitness rooms
Hallways
Party Rooms

One last thing: Don't be fooled by bate-and-switch pricing for multi-step, multi-product systems that are presented as being more affordable than Ecolo, but actually cost almost twice as much and are far more time consuming.

Why wait? Request your Free Assessment today by calling Ecolo at one of the telephone numbers shown below. You will have a customized proposal, including a review of our findings and a treatment plan, within 48 hours of our assessment.

4540 Eastgate Pkwy, Unit 2,
Mississauga, Ontario L4W 3W6

Seven signs it's time to call Ecolo

- Residents complain regularly about odour issues
- Existing odour control efforts are ineffective at times – or all the time
- Your maintenance personnel use more than one cleaning product in the garbage room
- You are unhappy with the spending on cleaning products for the garbage room
- Bacteria/ enzyme based products and masking agents are being used in your building
- You would prefer to use 100% natural and environmentally friendly products
- You would like more information on organics and the odours produced by organics
